

Discovering Europe. Handbook of Political Education.

In 2009 - 2010 a working-group of German, Estonian and Latvian authors developed a methodical handbook for political Education for raising gymnasium level students' awareness about the European Union. The handbook elaborates with the help of games and other interactive methods issues of people's identity, being informed, opportunities and future perspectives.

The handbook was issued in Latvian, Estonian and Russian languages and was distributed free to the teachers participating on the in-service training seminars.
